MMA DAILY RECOMMENDATIONS FOR  
MONDAY, AUGUST 19, 2024  
© MMA, INC, 2024

**Geocosmic Critical Reversal Dates (CRD):** These dates affect all markets. They are the midpoint of geocosmic clusters and have a range of three days on either side. Sometimes, they expand to as much as 5 days. The idea is to see a new two-week or greater high or low and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates. The more stars next to the date, the greater the historical correlation with a cycle end and reversal. For more information, please read Volume 3 of the Stock Market Timing series. Below is the date of the midpoint, and in parentheses, the length of time containing the geocosmic signatures (known as a "cluster"). If the cluster is long (more than 15 days), there may be other possible reversals based on tighter geocosmic clusters within the greater cluster.

**Aug 2-5\* (I think high in stocks 7/31 but could also be low Aug 5; low in Gold, Crude Oil, and BTC)**  
**Aug 16-19\*\* (maybe \*\*\* if given 10 trading days; Dem convention)**  
**Aug 28-29\***  
**Sep 2-3\*\*\* (may involve Aug 28-29)**  
**Sep 13-16\*\* (needs one week)**

These periods are usually more important than the solar/lunar reversal zones and are usually more accurate because they have a wider orb of time (+/- 3 trading days vs. +/- 1 trading day for solar/lunars). They will correspond more often with major, half-primary, or full primary cycles, whereas lunar reversals need only correspond to 2.5% reversals in stocks.

**ABBREVIATIONS:**

**CRD = Geocosmic Critical Reversal Date**  
**ATH = All-Time High**  
**MA = Moving Average**

**NOTE: Mercury is now retrograde, and as a policy, we do not take on new position trades during this time. Instead, we focus more on quick reversal trades for aggressive traders.**

**BTCQ (Aug Bitcoin):** Friday's close was bullish. It closed above the TIP for the 1<sup>st</sup> time in 3 days, which means it remains neutral.

The daily TIP is 58,946. It will remain neutral unless it closes sharply higher or lower today.

Daily support is 57,856-58,150.

Daily resistance is **60,716-61,010**.

A bullish crossover zone just formed at 56,820-57,085. Other bullish crossover zones are in effect at 52,155-53,270, 46,203-46,325, 40,348-41,072, 30,536-30,625, 20,033-22,440, 17,723-18,362, 14,535-14,590, 12,140-12,233, 11,240-11,420, 9685-10,445, 7850-8183, 5546-5673, 4166-4293, 3920-3940, 3602-3735, 3357-3413 and 3215-3327. It closed below others at **58,835-62,302 (held the high)**, 64,950-65,573, and 66,140-66,932, so this is now resistance.

A bearish crossover zone just formed at **59,601-61,588 (held the high)**. It closed above bearish crossover zones at 49,840-50,666, 49,472-49,562, 43,345-44,157, 45,240-45,312, 38,440-38,617, 33,007-35,217, 25,610-25,712, 21,130-21,833, 17,060-17,062, 9537-9588, 9003-9005, 8170-9070, 7112-7115, 3957-3960 and 3852-3950, so these are support now.

Bitcoin continues to consolidate at resistance, and Friday's rally staved off some of the immediate concerns of a lower-high. Friday stated, "... now it's falling into this CRD zone where another reversal from a low could form. Solar-lunar values don't point to a low, however, which is another concern." Let's see if it can clear resistance this week.

**UPDATED LUNAR REVERSAL SIGNALS (FOR CASH) AS OF OCT 8: These values match noon GMT instead of noon NYC since GMT is the change of date associated with Bitcoin.** The following table shows two sets of the weighted values. The left-hand set is of 12% or greater reversals based on lunar days from our studies, now going back to July 17, 2010. The right-hand set includes 10% of greater reversal values of Moon signs only since Uranus has been in Taurus. These numbers represent a potential for reversal, where anything above 120 has a high probability of an isolated top or bottom to trade the opposite of for a 12% reversal. We may have to adjust this first column down to 115 now that we have added another 4 years of data. \* represents a strong reversal possibility. The more \*, the stronger it is (however, the right-hand column can only hold one \* for now). The # represents a low likelihood of a reversal. The more #, the less likely a reversal or big range day. The best setup is when both sets of numbers for each sign agree with a reversal, low, or high. Keep in mind that these are purely lunar days, not solar/lunar days, as with metals and stocks. Please note that our studies are based on noon GMT and not Eastern Time since Bitcoin's Day is based in GMT, not Eastern Time, and noon is the middle of the trading day. However, since the high or low of the day may happen before or after noon, and the Moon can move up to 7 degrees in half of a day, we have to allow a one-day orb for these dates to manifest a correct setup.

The lunar cycles for Bitcoin for the next few days are as follows:

**Total cases since July 17, 2014**

**Total cases with Uranus in Taurus**

	<u>Reversal 12%</u>	<u>Lows</u>	<u>Highs</u>	<u>Reversals 10%</u>	<u>Lows</u>	<u>Highs</u>

**Position traders** are flat and may stand aside during Mercury Rx.

**Aggressive traders** are long with a stop loss on a close below 52,150.

**VAT: Very Aggressive Traders, trading mostly by the moon cycle**, are long with a stop loss on a close below 54,640. Cover all on a rally to 68,000 +/- 1000 if offered.

**ETHQ (Aug Ethereum):** Friday's close was bullish. It closed below the TIP for the 2<sup>nd</sup> consecutive day, which means it remains neutral.

The daily TIP is now 2630.50. It will be downgraded to a trend run down if it closes lower today.

Daily support is 2574-2582.

Daily resistance is **2654.50-2662**.

Bullish crossover zones are in effect at 2332-2339, 2158-2210, 1920.50-1974, 1865.50-1873, 1641.50-1664, 1452-1589 and 1353.50-1384. It closed below others at 2947.50-2949, 2863-2923, 2695-2712, 2463-2464.50, 3176-3333, so this is now resistance.

Another bearish crossover zone just formed at 2621-2622 (it closed here) to join another at 2745-2940.50. Other bearish crossover zones are in effect at 3943.80-4104, 4359-4432.80, 4566.80-4585.30, 4767.50-4767.80, 4763.30-4916.80. These are all resistance. It closed above others at 1771-1795, 1504-1539, 1134-1183, and 1083-1110.50, so these are now support.

Ethereum keeps chopping around, and now, in typical Mercury Rx fashion, we may have a higher-low associated with this CRD. It needs to close above 2900-3100 to be bullish again.

**Position traders** are flat and may stand aside for Mercury Rx.

**Aggressive traders** are long with a stop loss on a close below 2157.

**VAT:** are long with a stop loss on a close below 2157.

MMA's annual Forecast book is an astrological-themed almanac that has served students of cycles and markets since 1976. It provides a cyclical outlook of the collective world psychology, national economy, geopolitical overview, socio-cultural trends, weather and natural calamities potentials, as well as financial market projections for the U.S. stock market, the U.S. Treasury market, interest rates, Gold and Silver, currencies (the Euro, British Pound, Swiss Franc, and Japanese Yen), Bitcoin, Crude Oil, and Grain markets. Its extraordinary market timing forecasts are based on the historical correlation of market cycles overlapping with geocosmic planetary cycles. Additionally, it provides the three-star critical reversal dates for each market for the year, which have an 80+% accuracy over the years to trading cycle highs and lows when given an orb of three trading days. The book is approximately 200 pages, 8.5" x 11", and has set the standard for all astrological almanacs written today.

The 2024 MMA Investment Retreat will take place September 19-22, 2024, at the Rikli Balance Hotel in the Julian Alps region of beautiful Lake Bled, Slovenia. You won't want to miss this chance to hear the outlooks and wealth-building strategies using MMA market timing methods by top MMA analysts Raymond Merriman (USA), Gianni Di Poce (USA), Ulric Aspegrén (Switzerland), Pouyan Zolfagharnia (UK), Irma Schogt (Netherlands), Rita Perea (USA), Vincent Wang (Singapore), Wyatt Fellows (USA), plus special guest speakers Claude Weiss (Switzerland) and Aleksandar Imsiragic (Serbia). Special attention will be given to the stock markets of the USA, Germany, China, and Japan, plus Gold, Silver, Copper, Bitcoin, Wheat, Crude Oil, Real Estate, and interest rates. Every one of these markets is entering a time band for a long-term cycle low and, thus, an outstanding investment opportunity (in our MMA view). The Rikli Balance Hotel, where the event will take place, is now fully booked. However, cancellations do occur, so we are compiling a waiting list for the Rikli Balance Hotel in case that happens. **NOTE 3: YOUR PERSONAL "JUPITER REPORT — YOUR MOMENTS OF OPPORTUNITY" IS COMING!!!** Due to release in early September, this newest product is a report that all traders (and even non-traders) will find to be of great value. Raymond Merriman created this report, and it identifies the times during the year when Jupiter transits are highlighting your chart. It delineates the meaning of Jupiter's transits to your natal planets and angles over 14 months (including one month before your order and one month after the year ends). Why is this valuable to have? Because transits of Jupiter identify special opportunities for success, popularity, good fortune (luck), and gains in life when under harmonious aspects and used correctly. However, they can also indicate periods of potential misjudgment leading to losses if Jupiter is afflicted and the individual is not properly prepared. *As an added bonus, each transit is ranked from -3 to +3 in terms of favorability for trading. Traders may find this most valuable!* Would you like to know when you are most prone to trading successes or potential losses? You betcha! Stay tuned for information on how to order your personalized Jupiter report for the next year!

*Disclaimer and using this information properly: Futures and options trading involve the risk of large losses as well as large gains.*

*Information is provided herein with sincere intent and according to MMA's original research studies and methodologies. These reports are provided mainly for "speculators." By its very nature, "speculation" means "willing to take risk of loss." "Speculators" must be willing to accept the fact that they are going to have losing trades, many more than, say, "investors." That is why they are "speculators." The way "speculators" become profitable is not so much by a high percentage of winning trades but by controlling the amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades.*

*MMA's comments, strategies, and data are given to serve as guidelines for traders for each day and/or week. Comments and strategies are based upon intraday and intraweek highs, lows, and closes at the end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in directions of comments given, so long as those support/resistance (entrance) areas look favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy.*

*Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above; it is considered a bullish "trigger" and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below; it is considered a bearish "trigger" and oftentimes is a good sell signal.*
